

IMPAK SMC 2028 L SEALER

IMPAK SMC 2028

The **IMPAK SMC 2028 L Sealer** is equipped with an anti-adhesive Teflon coated sealing blade which ensures a neat and strong seal. It has an overheat protect function that extends the lifespan of the sealer. It includes a seal head clamping device designed to assist in avoiding damage to the product while increasing the safety for the operator. It features dual magnetic clamps which increase the sealing pressure ensuring a firm, strong and consistent seal. It is equipped with heavy duty casters with locks for better portability.
