

IMPAK 4255 ONE STEP

Packaging Systems Inc.

Impak 4255

The **IMPAK 4255** is a **fully electronically controlled** shrink wrap machine. It provides the best sealing and shrinking in **just one step**. The machine ensures that you get a neat and strong seal. It is equipped with a **hand clamping** device designed to assist in avoiding damage to the product while increasing the safety for the operator. Equipped with a **transparent hood**, you can watch the process and enable **prompt adjustment** to guarantee the best package. A reliable **perforation device** ensures a tight package after shrinking. It is equipped with **heavy duty casters** with locks for better portability.

PRODUCT SPECIFICATIONS

- Machine Dimension: 50" Long x 30" Wide,
- Sealing Area: 16.5" Wide x 21" Long
- Max. Product Height: 8"
- Sealing Type: Blade Micro-Knife
- Packing Speed: 4-6 p/m (Product + Operator Dependent)
- Max. Roll Width: 22"
- Working Plate Height(On stand) – 36"
- Power: 220 Volts, 1 Phase, 20 Amps
- Shipping Weight: 360 Lbs

PRODUCT FEATURES

- Large 16.5" x 21" Seal Area
- Dual-Magnet Clamping
- Teflon Coated Sealing Blade
- Start Shrinking after Sealing Function
- Automatic Adjustable Sealing Time
- Overheat Protect Function
- Quick Film Loading Cradle Design
- Film Micro Perforator System
- Adjustable Loading Table
- Hand Clamping Safety Device
- Heavy Duty Casters
- Rugged Steel Construction
- Low Maintenance
- Standby Function(Energy Saver)
- Easily Accessible Electrical Panel
- Durable Paint Finish
